Usage Instructions for Adapter LLAS-1000

- 1) Determine the correct voltage setting for your product. Do not select a voltage that is higher than the product was designed for. Damage will result from overpowering.
- 2) Select the determined voltage on the adapter by sliding the switch.
- 3) From the tips provided, select the tip that best fits your product.
- 4) Connect the selected tip to the adapter cord, **CAREFULLY** following polarity match above.
- 5) Connect the adapter cord to your product.
- 6) Read the message titled IMPORTANT. Don't skip this step.
- 7) Plug the adapter into your 120V power source and turn on your product.

IMPORTANT!!! When you plug the adapter into your 120V power source and turn on your product, the product should come on immediately. If the product does not come on immediately, unplug the adapter and double check steps 2 and 4 for accuracy. If you do not remove the power source immediately, you can damage or destroy your product.
