

Instructions for the Solar Lamp

Frequent questions

1. The light just received will not light up

Lamps having a light control sensor, or turn off automatically during daylight and strong local lighting, night lamps or clear areas for automatic lighting. During transport are installed switched on automatically without the consumption of lighting energy, the product should be put in the sunshine on the charge for at least 30 minutes before use, then put it in the dark room to see if lighting (once again determined if the damage in the box shipping)

2. Insufficient lighting time

Lamps with solar load, lighting time from the time compare the impact will be different, rain lamp lighting time will be greatly reduced. Direct sunlight illumination about 8 hours at full charge, sustainable lighting approximately 8-10 hours after full charge.

3. Is it possible to use rainy days?

Solar lamps in theory, there is light where it can be charged, but not direct sun loading effect will be very poor, it may not be fully charged in the rainy day, lighting time will be substantially reduced.

Product parameters

Light body material: LLDPE

Lamp holder material: ABS

Light source: LED

Battery capacity: 4000mAh

Waterproof Level: IP 68

Power: 3.5W

Solar panel: Glass

Wireless remote control

Remove the transparent PVC film from the bottom of the remote control before using the remote control.

Applicable scene

Swimming pool, courtyard, party, landscape engineering, lawn park, outdoor garden

Precautions

1. Unit will need charging prior to first use.
2. The product will charge throughout the day if placed outdoors and will automatically illuminate when dusk arrives.
3. During daylight the light will not work or respond to the remote control, this unit will only work in dusk/dark conditions

Ecology / Disposal

Packaging material and equipment are made from recyclable materials. The distribution of the remaining waste into different species facilitates the recycling of valuable raw materials. If the device is no longer used, dispose of it properly.

This symbol on the product means that it must not be disposed of with normal household waste. Please take it to a recycling point so that electrical and electronic equipment can be properly recycled

Even empty or defective rechargeable batteries must not be disposed of in the household waste: Always bring them to a special waste disposal and make an important contribution to the protection of our environment.

The battery must be removed from the device before disposal.

Disposal information is available from your local authority

WARNING

Do not open or disassemble the device as this will void the warranty.

The lithium-ion battery in the lamp can not be replaced by the user and can only be replaced by the authorized service provider.
